

Math

- Play "Guess My Number". Choose a number from 0-100. Write your number on a piece of paper and fold it in half. Give clues to a family member and see if they can guess your number. For example, my number has a 5 in the ones place. If you count by 5's less than 10 times, you will land on my number. My number is more than 30. My number has a 4 in the tens place. Can you guess my number? My number is 45!
- Try this [place value matching game](#) made just for you by Mrs. Tavares!
